Summary

I am hardworking and focus on producing the maximum amount of quality in my work.

I've done Bachelors in Information Technology from Punjab University College of Information Technology and possess **+2.5 years** of hands-on experience in implementing **Cloud-based software applications** and developing **Frontend applications** alongside **n-tier Architecture and Web Services**.

My expertise includes **ASP .NET**, **JavaScript**, and **MS SQL Server.**

I understand the importance of **open communication** amongst fellow teammates and the importance of **effective time management**. I understand that the ability to share alternative solutions with one's teammates from a variety of technical backgrounds as it is always fruitful and invaluable in one's personal growth.

I believe I can quickly **learn and adapt** to new environments and strive to serve as an integral part of an innovative team and meet an organization's true goals and objectives.

Education and Recognitions

2013 - 2017	**Bachelors of Information Technology**
	Punjab University College of Information Technology
	Appeared in the PUCIT Principal's List of High Achievers
	1. **Spring 2015** - GPA 4.00
	2. **Fall 2015** - GPA 3.68
	3. **Fall 2016** - GPA 3.79

Work experience

August 2018 - Present

Software Engineer

CureMD Research & Development

I was a **Full Stack Developer** at CureMD, working in **US Medical Billing and Reporting domain.** Some of the big projects that I worked on include

1. **Expert System Integration** in Billing to preemptively reduce claim rejection count.

2. Revamp the Problem Lists Module and implementing User Management Mechanism to **automate the problem list assignment** process.

3. Revamp the Referrals module and work directly on the **Core Development as well as the Usability and User Experience** of the newly developed module.

4. **Creating a Business Intelligence and Management tool** for the company which **helped spearhead the Agile Process into the company**. This tool consisted of **Backlog refinement options** and was directly **integrated with the Microsoft Team Foundation Server.**

August 2017 - July 2018

Assistant Software Engineer

CureMD Research & Development

CureMD was my first industrial experience right after graduation.

My responsibility was to revamp the Reports module from **ASP Classic pages** to **ASP .NET Web Forms** and converting **VB Scripts** to **JavaScript/JQuery** code. I was also responsible to implement **Platform Independence (PI)** - making the reports work in **cross-browser environments**.

Projects

Jan 2017 - Present

Innovation Projects
CureMD Research & Development

I have **proposed and successfully developed** the following projects as **personal innovative suggestions** at CureMD Research & Development:

1. Revamping the referrals module by User Interface reusability/flexibility and limiting the content flow on screen for the user to avoid overcrowdedness of information.

2. Users prompt reduction to enhance interruption-free user experience in the Superbill module.

3. Development of a dashboard to resolve client requests(L3s) at a decreased SLA.

Jan 2019 - Present

Good To Great Initiative
CureMD Research & Development

A team to promote the culture of effective communication, intelligent negotiation, and proactive coordination. The goal of this team is to promote the value of **innovation**, **integrity**, **Teamwork**, and **Respect** amongst the peers that enables all to bring not just good but GREAT results.

Apr 2019 - Aug 2019

Billing Rule Engine - Expert System
CureMD Research & Development

In this project, we enabled the doctors to identify and rectify insurance-claim rejections at the appointment stage which is far earlier than the billing stage, using a **C# based web service**. This step **reduced the insurance-claims rejections drastically and improved the overall efficiency of the billing process.**

2014 - 2017

UI/UX/Designing Projects
Personal Projects

Some of my **UI/UX Design** projects. These projects are showcased on Behance. Please follow the link to view this project: **https://behance.net/fahadachaudhry**

Skills

ASP .NET

Worked in **ASP .NET** in **MVC** as well as in **n-tier** structure. The possibilities for scalability are endless. Love to participate in **architectural design** sessions and to make the product more mature and robust.

JavaScript/JQuery

Worked in major **JavaScript/JQuery projects** where I **shifted the entire code from VB to JavaScript.** I'm a huge javascript enthusiast. Always up for working in different JavaScript frameworks.

MS SQL Server

I have an in-depth understanding of **relational databases** such as MSSQL Server and possess deep knowledge about **Stored Procedures, Views and Database Schemas.**

Soft Skills

User Interface Designing

Presentation/Demonstration and Crowd Management/Training Capabilities
